Fund Manager's Report

The Fund declined 0.09% during the month, outperforming the benchmark by 0.07%.

The US Fed kept interest rates unchanged at 5.25-5.50% at the FOMC meeting on 1st May, citing concerns over lingering price pressures in the US economy. Policymakers also reaffirmed the need for more evidence that inflation is cooling before they begin cutting interest rates. The US Treasury (UST) market rallied strongly in May, despite the overall hawkish tone of the FOMC meeting, with benchmark 10-year yields plummeting by 37bps from 4.68% at end-April to touch 4.31% in mid-May, after a series of weaker-than-expected US economic data reignited hopes for potential rate cuts.

With the overall fixed income market outlook turning positive again, we will continue to be invested in selective sovereign and corporate sukuk. For corporate sukuk, we continue to prefer highly liquid, blue-chip government-related companies, utility companies, as well as those with strong financials and robust cash buffers, to weather changes in economic landscapes.
